

Bash/Linux Tutorial

COMP 206 TA : Prabhjot Sandhu

Basic Commands

Remote login

- * Command :
`ssh <username>@teaching.cs.mcgill.ca`
- * Use cs login and password

A terminal window titled "Prabh — ssh psandh3@teaching.cs.mcgill.ca — 80x24" showing the execution of an SSH command. The prompt is "MacBook:~ Prabh\$". The command "ssh psandh3@teaching.cs.mcgill.ca" is entered. The terminal shows the password prompt, a welcome message for Ubuntu 16.04.4 LTS, and the last login information. The prompt changes to "psandh3@teaching ~ \$".

```
MacBook:~ Prabh$ ssh psandh3@teaching.cs.mcgill.ca
psandh3@teaching.cs.mcgill.ca's password:
Welcome to Ubuntu 16.04.4 LTS (GNU/Linux 4.4.0-127-generic x86_64)
There are 13 users logged in.

New to our distributed GNU/Linux system? Type 'less /var/docs/00_welcome.txt'.

Last login: Sun Sep 16 21:43:43 2018 from 132.206.54.11
psandh3@teaching ~ $
```

Present working directory

* Command :
pwd

```
psandh3@teaching ~ $ pwd  
/home/2015/psandh3  
psandh3@teaching ~ $
```

Make directory

- * current directory : .

- * home directory : ~

- * root directory : /

- * Command :
mkdir <dir_name>

```
[psandh3@teaching ~]$ mkdir tutorial1  
[psandh3@teaching ~]$
```

Change directory

- * Previous directory : ..

- * Command :
`cd <dir_name>`

```
[psandh3@teaching ~ $ cd tutorial1/  
[psandh3@teaching ~/tutorial1 $ pwd  
/home/2015/psandh3/tutorial1  
psandh3@teaching ~/tutorial1 $ █
```

Create file

- * Command :
`echo "some text" > <filename>`

```
[psandh3@teaching ~/tutorial1 $ echo "Hi" > a
```

- * Command :
`touch <filename>`

```
[psandh3@teaching ~/tutorial1 $ touch a  
[psandh3@teaching ~/tutorial1 $ touch b  
[psandh3@teaching ~/tutorial1 $ touch c
```

List files

* Command :
ls

```
psandh3@teaching ~/tutorial1 $ ls  
a  b  c  
psandh3@teaching ~/tutorial1 $ █
```

Example

- * Create the following directory structure :
- * `pjot_fall2018/comp206/tutorial1/`
- * `pjot_fall2018/comp206/tutorial1/file1`
- * `pjot_fall2018/comp206/tutorial1/file2`
- * `pjot_fall2018/comp206/tutorial2/`

Copy

* Command :

cp <source> <destination>

```
[psandh3@teaching ~ $ cd tutorial2/  
[psandh3@teaching ~/tutorial2 $ cp ~/tutorial1/a ./  
[psandh3@teaching ~/tutorial2 $ ls  
a  
psandh3@teaching ~/tutorial2 $ █
```

Move

* Command :

mv <source> <destination>

```
[psandh3@teaching ~/tutorial2 $ ls ../tutorial1
a  b  c
[psandh3@teaching ~/tutorial2 $ mv ../tutorial1/a ./
[psandh3@teaching ~/tutorial2 $ ls ../tutorial1
b  c
[psandh3@teaching ~/tutorial2 $ ls
a
psandh3@teaching ~/tutorial2 $ █
```

WC

- * print newline, word count for a given file
- * Input redirection : <
- * Command :
`wc -l < <filename>`

```
psandh3@teaching ~/tutorial1 $ wc -l < b
0
psandh3@teaching ~/tutorial1 $
```

cat

- * Output redirection : >

- * Command :
cat <filename>

```
[psandh3@teaching ~/tutorial2 $ echo "Hello World!" > hello.dat  
[psandh3@teaching ~/tutorial2 $ ls  
a  hello.dat  
[psandh3@teaching ~/tutorial2 $ cat hello.dat  
Hello World!  
[psandh3@teaching ~/tutorial2 $ █
```

Manpage

- * `man` : system's manual pager
- * press `q` to quit
- * Command :
`man <command_to_know>`

Pipes

- * hold the output of one program and feed it to the input of another : |

```
[psandh3@teaching ~/tutorial1 $ ls -la > my_list.dat
[psandh3@teaching ~/tutorial1 $ ls
a  b  c  my_list.dat
[psandh3@teaching ~/tutorial1 $ cat my_list.dat

```

Bash Scripting

Bash Scripting

```
#!/bin/bash
```

```
echo "Hello, World!"
```

```
[psandh3@teaching ~/tutorial1] $ vim my.bash  
[psandh3@teaching ~/tutorial1] $ ls -l my.bash  
-rw-r--r-- 1 psandh3 nogroup 37 Sep 16 22:57 my.bash  
[psandh3@teaching ~/tutorial1] $ chmod 755 my.bash  
[psandh3@teaching ~/tutorial1] $ ls -l my.bash  
-rwxr-xr-x 1 psandh3 nogroup 37 Sep 16 22:57 my.bash  
[psandh3@teaching ~/tutorial1] $ ./my.bash  
Hello, World!  
psandh3@teaching ~/tutorial1 $ █
```

Variables

```
#!/bin/bash

echo "Hello, World!"
x=3
y=4
z=$((x+y))
echo $z
```

```
[psandh3@teaching ~/tutorial1 $ vim my.bash
[psandh3@teaching ~/tutorial1 $ ./my.bash
Hello, World!
7
psandh3@teaching ~/tutorial1 $ █
```

back-ticks

```
#!/bin/bash
```

```
z=`echo "Hello, World!" | wc -w`  
echo $z
```

```
[psandh3@teaching ~/tutorial1 $ vim my.bash  
[psandh3@teaching ~/tutorial1 $ bash my.bash  
2  
psandh3@teaching ~/tutorial1 $ █
```

Control flow

```
#!/bin/bash

dir=$1
y=`ls $dir | wc -l`

if test $y -gt 0
then
    echo "There are following files :"
    ls
else
    echo "The directory is empty"
fi
```

```
[psandh3@teaching ~/tutorial1 $ vim my.bash
[psandh3@teaching ~/tutorial1 $ ./my.bash .
There are following files :
a  b  c  my.bash  my_list.dat
psandh3@teaching ~/tutorial1 $ █
```

Some more Commands

cut
